

Goldstein Residence

Rancho Mirage, CA; Architect: David Olson

Project Description: 32 RQ60AUM's in a custom enclosure with an RQ bridge tied to the Crestron System control a mix of Designer Screen Shades and Duette Architella shades. Two windows stand out on the project an oversized sliding door in the great room where we layered roller shades to cover the large area, and an office window that stairsteps as an architectural detail. All the shades were recessed into window soffits and prewired before the house was drywalled.
